

Team Name: Arthur's Team
Team Members: Arthur Levitsky

Class: CSIT 337: Internet Computing

Instructor: Dr. John Jenq

Date: Tuesday, April 28, 2020

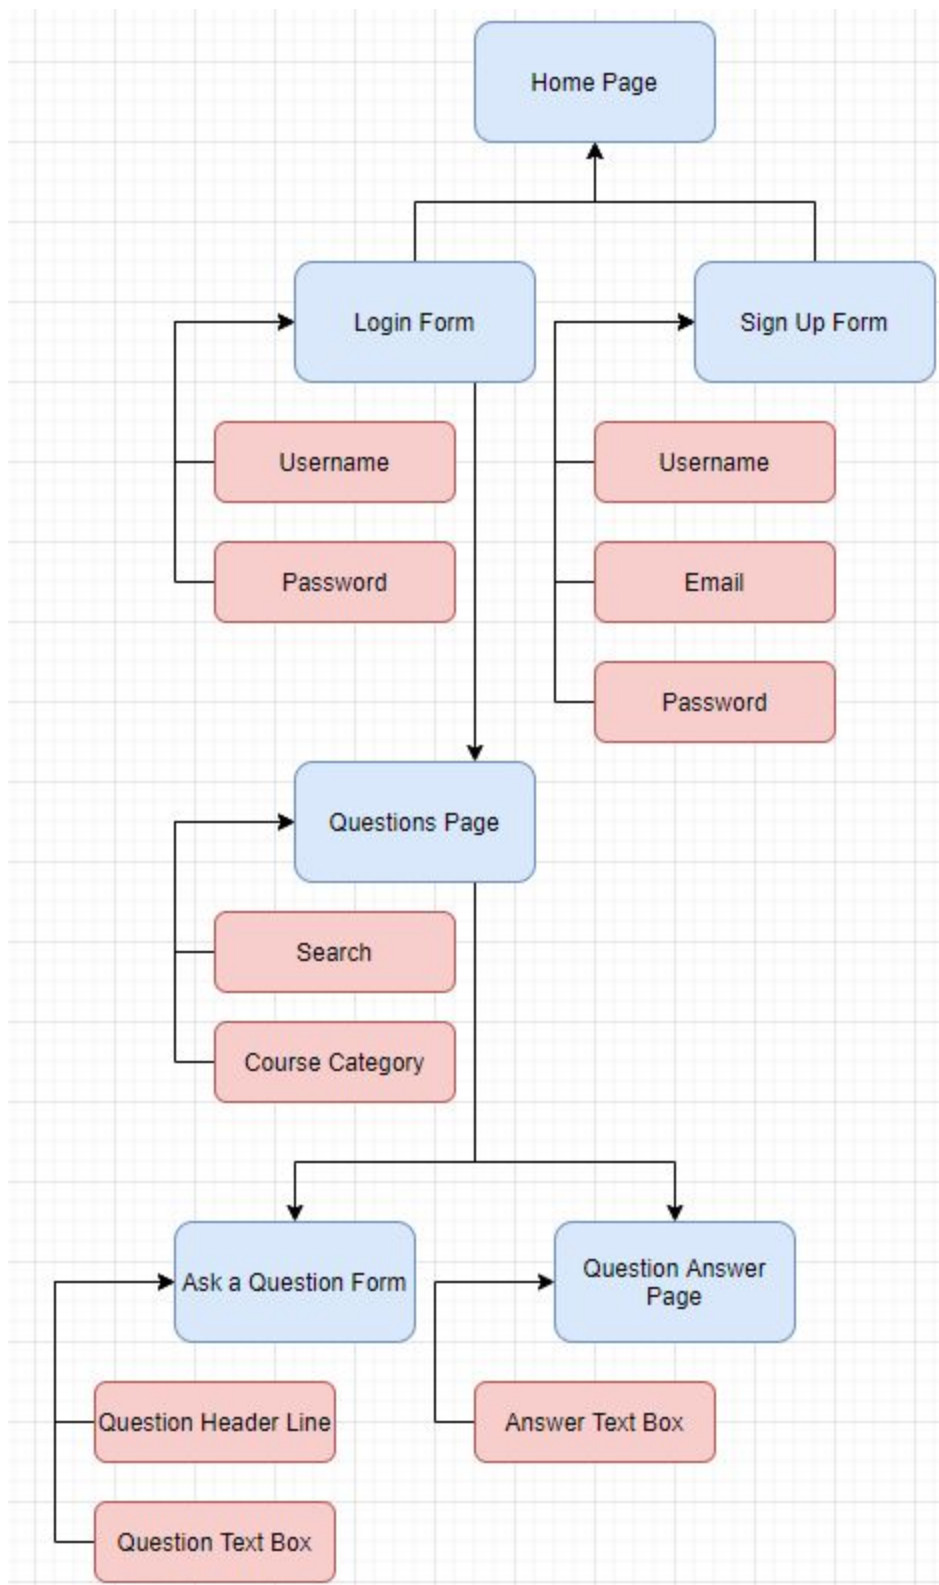

Contribution Sheet:

- This website was fully constructed by Arthur Levitsky. The following scripting languages utilized in this website are:
 - HTML: Arthur Levitsky - 100%
 - CSS: Arthur Levitsky - 100%
 - PHP: Arthur Levitsky - 100%
 - MYSQL: Arthur Levitsky - 100%
- The website was both designed and wired to a database by Arthur Levitsky. The design of this website was created from scratch using just pure HTML and CSS, no frameworks were utilized.
- PHP was used in some files with HTML even though their extension was .php. The purpose was to display dynamic objects such as the questions on the main page as well as display text if there is an error with logging in, signing up, or posting a question on the forms of the website.
- MYSQL was created with three tables known as *answers*, *hh_users*, and *questions*. *Hh_users* holds the user data, *answers* hold answer data to the questions, and *questions* holds question data.

Project Summary:

1. What is the name of the website?
 - Hawk Heap
2. What is the purpose and description of your website?
 - The purpose of this website is to provide users the ability to input questions and answers on computer science based on courses covered in Montclair State University.
 - The website will have sections developed for CSIT courses from MSU so that users can go to those specific sections based on the class they have.
 - The website also hosts a log out button for whenever the user wants to leave the main page of the website and back to the home page.
 - The user will have an option to submit a question that will get posted to the database and displayed on the website.
 - Users will be able to see that question and post an answer to that question.
 - Users will need to create an account to post questions and answers.
 - Users will need to create a unique username as well use a unique
3. Team Name? Team Members? Team Leader?
 - Team Name: Arthur's Team
 - Team Members: Arthur Levitsky
 - Team Leader: Arthur Levitsky
4. Where Does the Team Meet?
 - No team, just Arthur Levitsky

5. Draft Layout of Websites and pages (Site map):

Description and how many front pages? (View: These pages that interact with users), and their relationship if any, what technologies will be used (JavaScript, CSS, xml, or just pure HTML, etc.)

- I have a total of 6 front pages. All of these webpages will be using HTML and CSS. 4 pages will use some sort of form that will post to a database. 1 page would most definitely have to use PHP as it will need to display the questions to the user to view them.

Table of Contents:

Title Page.....	1
Contribution Page.....	2
Project Summary Page.....	3-5
Table of Contents Page.....	6
Project Plan Page (UI/UXWireframes).....	7-14
User Manual Page.....	15-27
Program Source Files Page.....	28-70
Database and Script File.....	71-76
Website Screenshots.....	77-84
Website Video Demo.....	85

Project Plan Page (UI/UX Wireframes):

1. How many server side scripts (can you estimate)?
 - Initially, I have estimated to have roughly **10 server side** scripts for my website.
2. How many scripts do you actually have for your website as a final result? For each php script state the name, purpose, functionality, and which page(s) it related to. If it connects to a database? If it does, state the details of the connection.
 - In total as a final result, I have **11 server side** scripts.
 - **signup_verification.php** → When a user implements username, email, and password, the php script obtains those values from the user and communicates with the database to check whether the username or email already exists. If it does, then the data from the user will not be posted into the *hh_users* database.
 - **signup_page.php** → This page displays the html form for which the *signup_verification.php* will include. The reason why this page utilizes php as well is because it displays an error message to the user if the contents that he is trying to post has already been used.
 - **signup_success.php** → If *signup_verification.php* says that the users has implemented a valid username and email, then the user will be prompted with this page that congratulates him on creating an account and also displays his account name.
 - **login_verification.php** → When a user implements a username and password, the php script obtains those values from the user and communicates with the database to check whether the username and password are correct. If what the user has posted isn't correct, then he will not be given entry to the *main_search.php*
 - **login_page.php** → This page displays the html form for which the *login_verification.php* will include. The reason why this page utilizes php as well is because it displays an error message if the username or password is incorrect.
 - **main_search.php** → This page displays both the html of the page with the search bar and select course option. It also displays two buttons for creating a question and logging out of the page and returning to the *home_page.html*. This page also utilizes php by obtaining the questions displayed in a table format from the *questions* table in the database. The user can click on the question to transfer to an *answer_page.php*
 - **question_verification.php** → When a user implements the course number, question, and the question details, the php script obtains those values from the user and communicates with the database to check whether a question like that

already exists. If the question is EXACTLY the same as the question already implemented in the database, then this script will not pass the data from the user to the database. This saves the database from filling up with the same questions and promotes the use of reading through the questions already posted.

- **question_page.php** → This page displays the html form for which the question_verification.php will include. The reason why this page utilizes php as well is because it displays an error message if the question already exists in the database.
- **question_success.php** → If question_verification.php says that the users has implemented a valid question, then the user will be prompted with this page that congratulates him on successfully creating the question that he had posted.
- **answer_page.php** → When the user clicks on a question from the main_search.php, he will be prompted with a small html form where people could reply to the question. The question will be displayed on top as the title and below that will be the question details. You can return and come back to see that the answers still exist with the question that is displayed.
- **database_error_page.php** → This is only displayed if the database server is not functioning with the apache web server. It displays an error message.

CSIT 340: What does DNS stand for?

Hi There! I'm a little confused on what DNS stands for? could somebody help?
Your help is much appreciated!

ANSWER TO THE QUESTION:

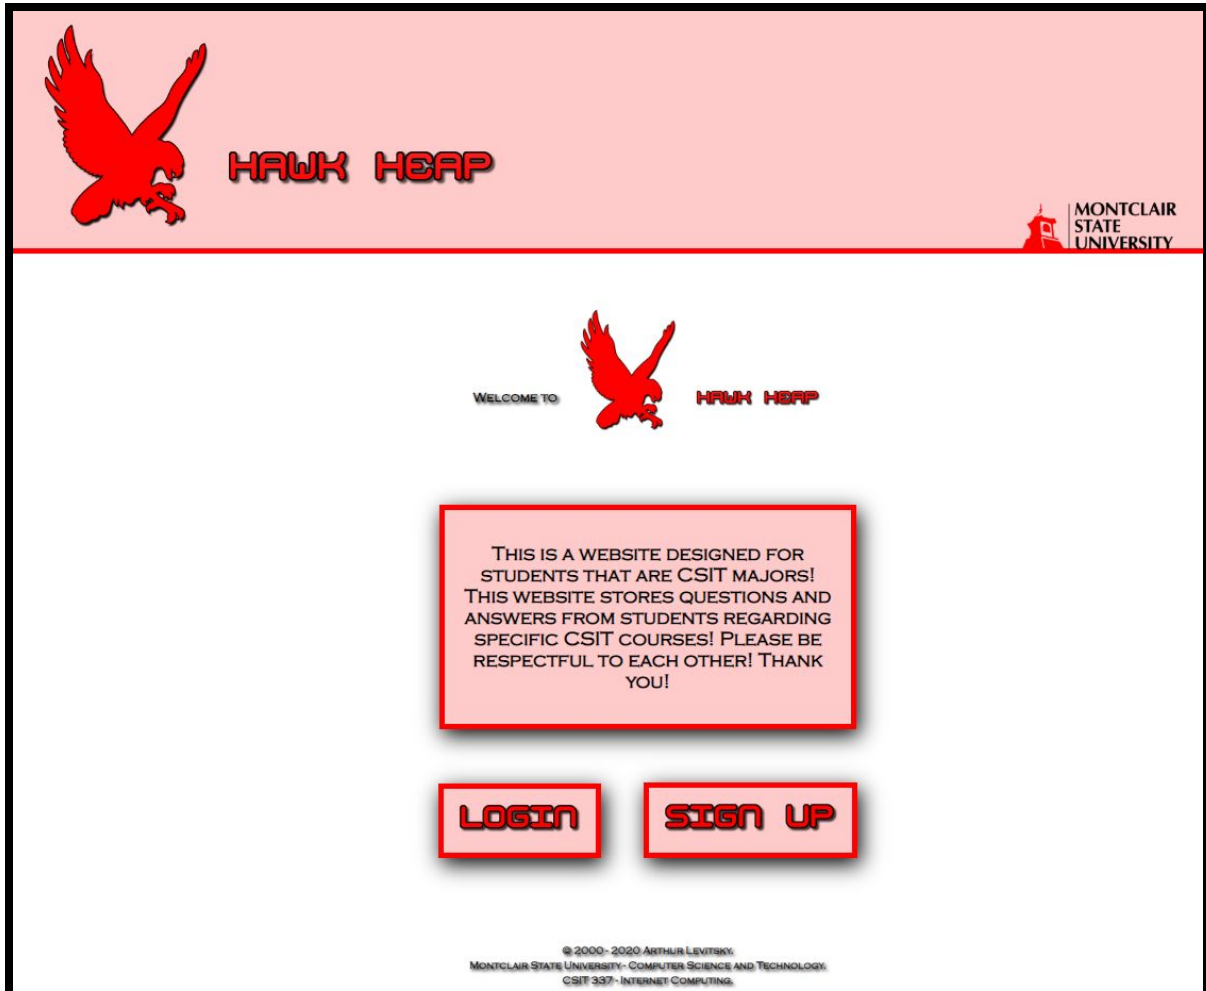

Hi There! DNS stands for Domain Name System! It is used to convert domains
numeric ip addresses! For example, when typing out a url, DNS servers locate
the ip address associated with that domain

User Manual:

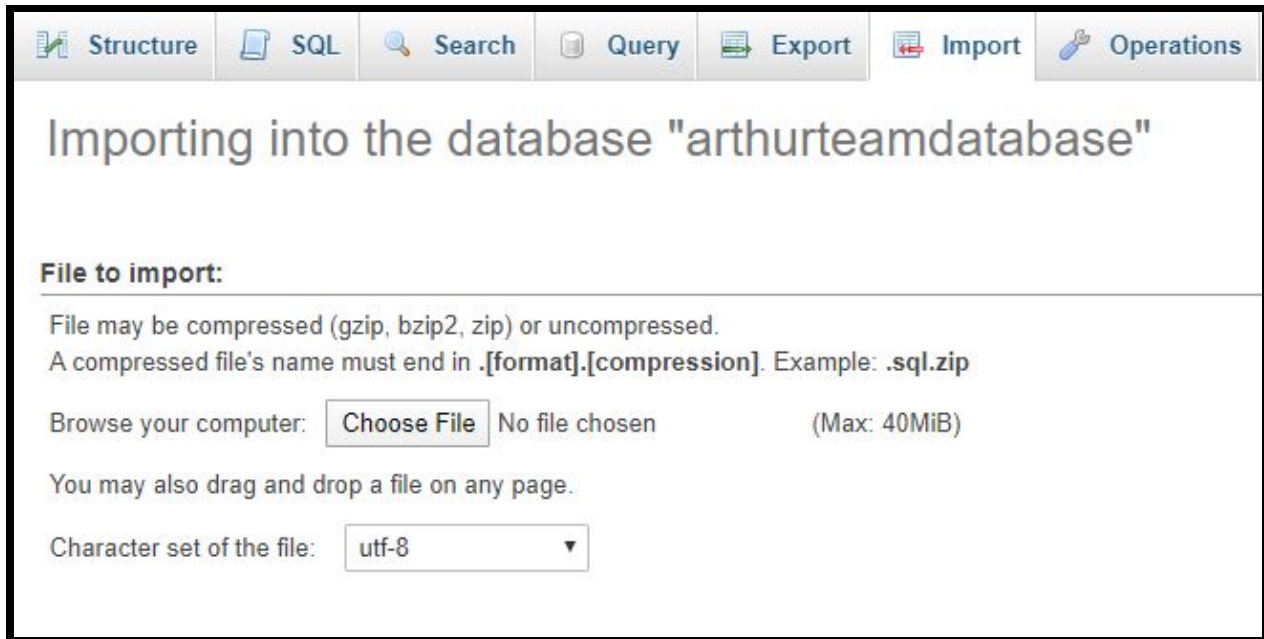

1. When you open the **arthurteamProject** folder, you will see various files within it. **Do not worry** about the photoshop_files folder or the web_images folder. Make sure to have the Apache server on and the MySQL server on as well through XAMPP. Dump this folder into the htdocs folder in XAMPP.

	photoshop_files	4/25/2020 8:32 PM	File folder	
	web_images	4/27/2020 7:37 PM	File folder	
	answer_page	4/27/2020 11:41 PM	PHP File	7 KB
	arthurteam.sql	4/28/2020 9:36 PM	SQL File	5 KB
	database_error_page	4/21/2020 8:39 PM	PHP File	2 KB
	index	4/27/2020 9:40 PM	Chrome HTML Do...	3 KB
	login_page	4/27/2020 10:33 PM	PHP File	3 KB
	login_verification	4/28/2020 8:18 PM	PHP File	2 KB
	main_search	4/28/2020 11:45 PM	PHP File	7 KB

	signup_success	4/25/2020 5:14 PM	PHP File	3 KB
	signup_verification	4/28/2020 8:49 PM	PHP File	2 KB

2. Once that is done, type in **localhost/arthurteamProject** in the browser you are using and it should automatically show you the index.html page. This page is the home page of the website. If it doesn't, please click on **index.html**.

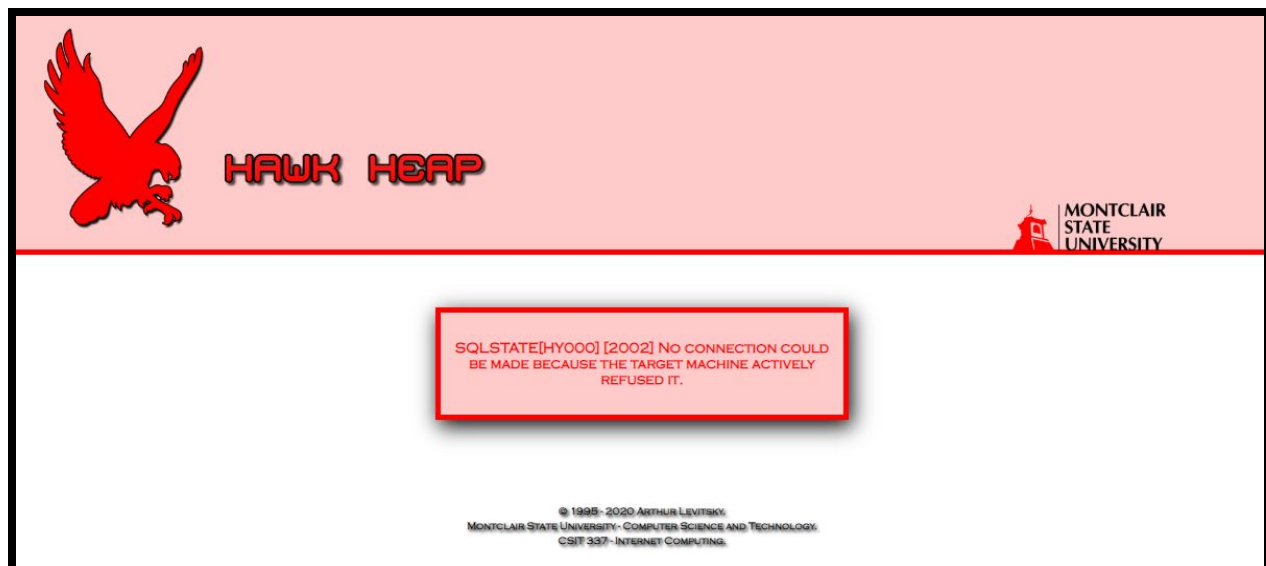

3. Make sure that you have imported the **arthurteam.sql** file into phpMyAdmin. In order to do this you would need to login through **localhost/phpmyadmin** and create a database called **arthurteamdatabase**. Next, go to that database you have created, and click on **import**. Once you have done that open the file from the **arthurteamProject** folder called **arthurteam.sql** and hit **go**. All the tables and privileges will be created in the **arthurteamdatabase** in your computer.

The screenshot shows the phpMyAdmin interface with the 'Import' tab selected. The title is 'Importing into the database "arthurteamdatabase"'. Under 'File to import:', it states 'File may be compressed (gzip, bzip2, zip) or uncompressed. A compressed file's name must end in .[format].[compression]. Example: .sql.zip'. There is a 'Browse your computer:' section with a 'Choose File' button, 'No file chosen' text, and '(Max: 40MiB)' limit. Below this is a note 'You may also drag and drop a file on any page.' and a 'Character set of the file:' dropdown menu set to 'utf-8'.

4. Once you have done that as well, you may now utilize the sign up button and the login button. If the database does not link, then you will receive an error from this php file.

5. Click the **sign up button**, in this page you will be required to implement a username, email and password.

The screenshot shows a web page with a pink header. On the left is a red hawk logo. To its right is the text 'HAWK HEAP' in a stylized, outlined font. On the far right of the header is the Montclair State University logo, which includes a red building icon and the text 'MONTCLAIR STATE UNIVERSITY'.

In the center of the page is a 'SIGN UP FORM' box with a red border. The form contains the following fields and elements:

- SIGN UP FORM** (title)
- USERNAME:
- E-MAIL:
- PASSWORD:
-
- WELCOME! YOU MUST SIGN UP TO VIEW THE CONTENTS OF THIS SITE!

At the bottom of the page, centered, is the following copyright notice:

© 2000-2020 ARTHUR LEVITSKY.
MONTCLAIR STATE UNIVERSITY - COMPUTER SCIENCE AND TECHNOLOGY.
CSIT 337 - INTERNET COMPUTING.

If what you have entered shows up with an **ERROR** sign at the bottom, that means that the username or email has already been taken. Please try again.

CSIT 337 - INTERNET COMPUTING.

If you do not get an **ERROR** and instead redirected to a page that congratulates you on signing up, then that username, email, and password will be published to the *hh_users* in the database.

					userID	username	email	password
<input type="checkbox"/>	Edit	Copy	Delete		28	anonymous123	hello123@gmail.com	sesame101
	<input type="checkbox"/> Check all	With selected:		Edit	Copy	Delete	Export	

6. When you click the return button, it should return you back to the **index.html** page. From there, click on the **login button**. Once you do that type in the username and password you have created. If your username or password is incorrect, you will be prompted with an **ERROR** message.

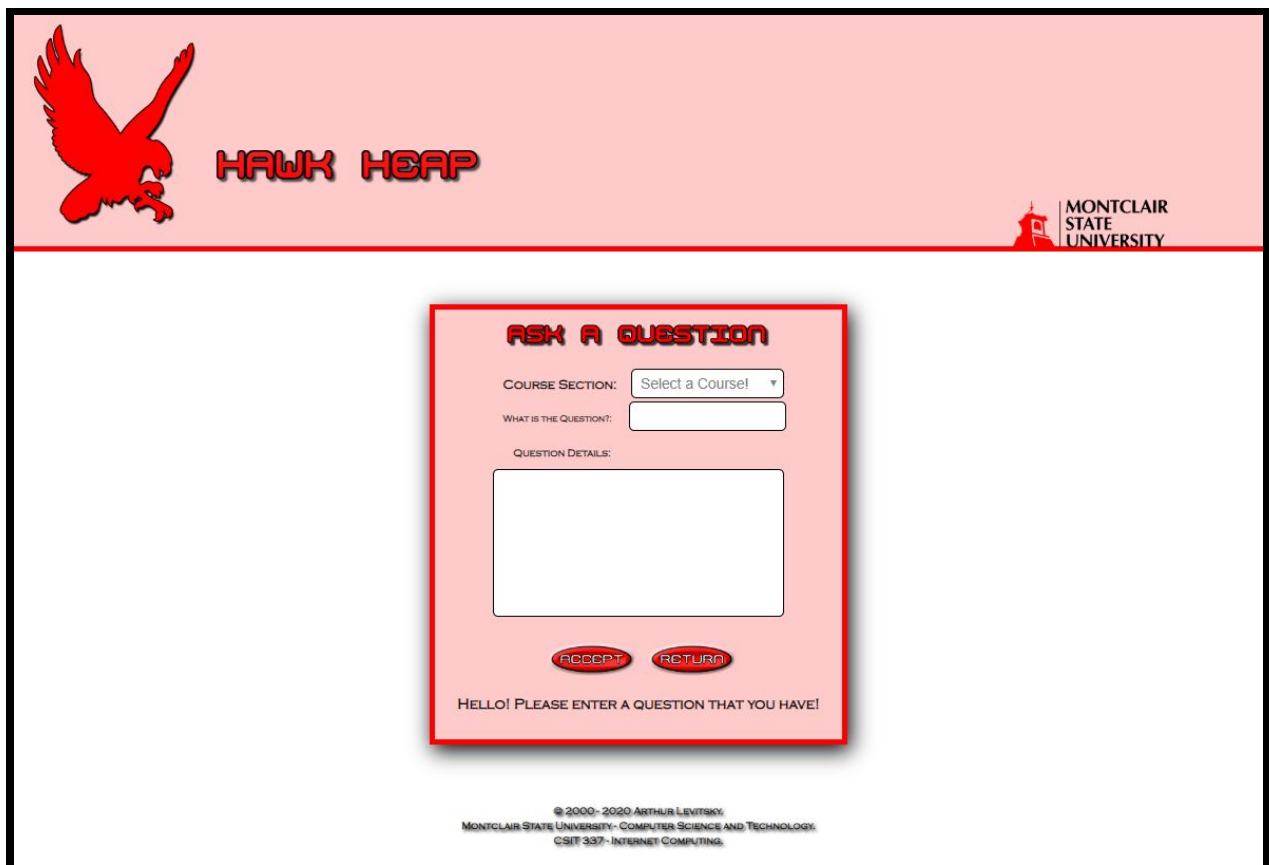

The screenshot shows a web page with a pink header. On the left is a red hawk logo. In the center is the text "HAWK HEAP" in a stylized red font. On the right is the Montclair State University logo. Below the header is a white area containing a red-bordered box. Inside this box, the title "LOGIN FORM" is at the top. Below it are two input fields: "USERNAME:" with the value "username123" and "PASSWORD:" with a masked password "*****". Below the fields is a red "ACCEPT" button. Under the button is a red error message: "ERROR: UNFORTUNATELY THE USERNAME OR PASSWORD YOU ENTERED IS NOT CORRECT! PLEASE TRY AGAIN!". At the bottom of the page, there is a small copyright notice: "© 1995-2020 ARTHUR LEVITSKY, MONTCLAIR STATE UNIVERSITY- COMPUTER SCIENCE AND TECHNOLOGY, CSIT 337- INTERNET COMPUTING."

7. Once you implement the **correct** username and password that you created earlier, then you will be provided access to the **main_search.php** page.

The screenshot shows the 'HAWK HEAP' web application interface. At the top left is a red hawk logo. To its right is the text 'HAWK HEAP' in a stylized red font. Further right is the Montclair State University logo. Below the header is a search bar with a dropdown menu labeled 'Select a C', a text input field labeled 'Search a Question!', and a red 'CONTINUE' button. Below the search bar is a list of four questions, each with a course ID and a question text: 'CSIT 104: WHAT IS A FOR LOOP?', 'CSIT 230: WHAT IS AN ALU?', 'CSIT 340: WHAT IS THE HTTP PROTOCOL?', and 'CSIT 212: WHAT IS THE TIME COMPLEXITY OF THE MERGE SORT ALGORITHM?'. Below the list are two buttons: 'GOT A QUESTION?' and 'LOG OUT'. At the bottom, there is a copyright notice: '© 2000-2020 ARTHUR LEVITSKY, MONTCLAIR STATE UNIVERSITY - COMPUTER SCIENCE AND TECHNOLOGY, CSIT 337 - INTERNET COMPUTING.'

↑ <input type="checkbox"/> Check all With selected: Edit Copy Delete Export				

8. In the **search bar**, you can use the **course search option** if you want to search questions based on the courses or you could use the **search bar** to search up **specific keywords**. If you want to use the search bar, make sure that course search is selected to **None Courses Selected**.
9. If you want to **log out** of the **main_search.php** page, click on the **log out button**, it will redirect you to the **index.html** page.
10. If you want to **create a question**, then click on the **question button** in the **main_search.php**. It will redirect you to the **question_page.php**

The screenshot displays the Hawk Heap website interface. At the top left is a red hawk logo, and next to it is the text "HAWK HEAP". On the top right is the Montclair State University logo. The main content area features a central form titled "ASK A QUESTION" with a red border. The form includes a "COURSE SECTION:" dropdown menu with "Select a Course!" as the selected option, a "WHAT IS THE QUESTION?" text input field, and a "QUESTION DETAILS:" text area. Below the text area are two red buttons labeled "ACCEPT" and "RETURN". At the bottom of the form, it says "HELLO! PLEASE ENTER A QUESTION THAT YOU HAVE!". The footer of the page contains copyright information: "© 2000- 2020 ARTHUR LEVITSKY, MONTCLAIR STATE UNIVERSITY- COMPUTER SCIENCE AND TECHNOLOGY, CSIT 337- INTERNET COMPUTING."

11. In the **question_page.php**, you need to implement the course section, the question that you have, and the details in it as well. All of that is **required** otherwise you will not be able to post. If your question is the same exact question as the one that is already in the database, then you will be prompted with an **ERROR** saying that the question already exists so try a different question.

The screenshot displays a web application interface for "HAWK HEAP" at Montclair State University. The header features a red hawk logo and the text "HAWK HEAP" in a stylized font. The Montclair State University logo is in the top right corner. The main content area is titled "ASK A QUESTION" and contains a form with the following fields:

- COURSE SECTION: A dropdown menu with "Select a Course!" as the placeholder.
- WHAT IS THE QUESTION?: A single-line text input field.
- QUESTION DETAILS: A large multi-line text area.

Below the form are two buttons: "ACCEPT" and "RETURN". An error message is displayed below the buttons:

ERROR: UNFORTUNATELY! THAT SAME EXACT QUESTION ALREADY EXISTS! PLEASE RETURN TO MAIN MENU!

At the bottom of the page, the copyright information reads: © 2000 - 2020 ARTHUR LEVITSKY, MONTCLAIR STATE UNIVERSITY - COMPUTER SCIENCE AND TECHNOLOGY, CSIT 337 - INTERNET COMPUTING.

12. Once you do manage to post a question, you will be redirected to the **question_sucess.php** which will congratulate you on successfully posting your question to the website. The return button prompts you back to the main page of the website.

13. Click on any of the questions that you see, the questions in the **main_search.php** act as a hyperlink that transfers the question over to a new page called **answer_page.php**.

CSIT 230: WHAT IS MIPS ASSEMBLY?

HELLO! I AM VERY CONFUSED ON WHAT MIPS ASSEMBLY IS. COULD SOMEONE EXPLAIN?

ANSWER(S):

SEND ANSWER:

ACCEPTRETURN

© 2000 - 2020 ARTHUR LEVITSKY.
MONTCLAIR STATE UNIVERSITY - COMPUTER SCIENCE AND TECHNOLOGY.
CSIT 337 - INTERNET COMPUTING.

14. In this page, you are able to reply to the question. The answers are linked with the **questionID** therefore when you click on a **different question, different answers show up**. Once you hit accept, the **page refreshes** and the answer shows below.

CSIT 230: WHAT IS MIPS ASSEMBLY?

HELLO! I AM VERY CONFUSED ON WHAT MIPS ASSEMBLY IS. COULD SOMEONE EXPLAIN?

ANSWER(S):

MIPS ASSEMBLY LANGUAGE SIMPLY REFERS TO THE ASSEMBLY LANGUAGE OF THE MIPS PROCESSOR. THE TERM MIPS IS AN ACRONYM WHICH STANDS FOR MICROPROCESSOR WITHOUT INTERLOCKED PIPELINE STAGES.

SEND ANSWER:

CSIT 230: WHAT IS MIPS ASSEMBLY?

HELLO! I AM VERY CONFUSED ON WHAT MIPS ASSEMBLY IS. COULD SOMEONE EXPLAIN?

ANSWER(S):

SEND ANSWER:

ACCEPT

RETURN

CSIT 230: WHAT IS MIPS ASSEMBLY?

HELLO! I AM VERY CONFUSED ON WHAT MIPS ASSEMBLY IS. COULD SOMEONE EXPLAIN?

ANSWER(S):

MIPS ASSEMBLY LANGUAGE SIMPLY REFERS TO THE ASSEMBLY LANGUAGE OF THE MIPS PROCESSOR. THE TERM MIPS IS AN ACRONYM WHICH STANDS FOR MICROPROCESSOR WITHOUT INTERLOCKED PIPELINE STAGES.

SEND ANSWER:

ACCEPT
